- Safety
- Reliability
- Accessibility

Now our lake is only a short, smooth ride away.

"We wanted an easy way to access our dock. The painless purchase and installation of our Marine Innovations lift made it reality. Mike made the planning process easy. The installation crew was professional and efficient. The workmanship is excellent. Now our lake is only a short, smooth ride away."

Bruce Gillies, Lake Almanor, CA

No more carrying stuff up and down the hill.

"We love the convenience of our Marine Innovations tram. We enjoy the simplicity and ease of riding to the dock, no more carrying stuff up and down the hill. Our grandkids love it too. Mike and Lori were a joy to work with throughout the entire process."

Carol Ferris, Lake Almanor, CA

The Marine Innovations tram is a lifesaver.

"Our dock was unusable, 200' down a bank at a 30 degree angle. The Marine Innovations tram is a lifesaver. Easy and functional, it makes travel to the water, and the best part, back up to our house, a breeze. Nick was professional, delivering everything he promised on time. I give them my highest recommendation."

M.D.W., Knoxville, TN

A Marine Innovations hillside tram will effortlessly whisk you, your family and gear from your house to dockside. Enjoy your view and the water, without the worry of stairs. With over 30 years of experience, a Marine Innovations tram will deliver decades of dependable service.

Your Marine Innovations tram features:

- Generous 860 pound capacity
